

# Wood Cure.co

Design, Refurbish, Build

Ayden Logan  
CEO & Founder  
Organization HGP Alumni

# The Problem

1. Promoting items that are affordable for customers.
  2. Finding a cheap supplier. I realized that
- Building items can be time consuming and very expensive.

# The Solution

- Making a cheaper alternative to buying wood so it's cheaper and easier to do construction.
- Building a supply chain for design aesthetic & manufacturer for my customers.

# Market size

Total Addressable Market :of construction industry is 6.4 trillion in 2020 and will double by 2030

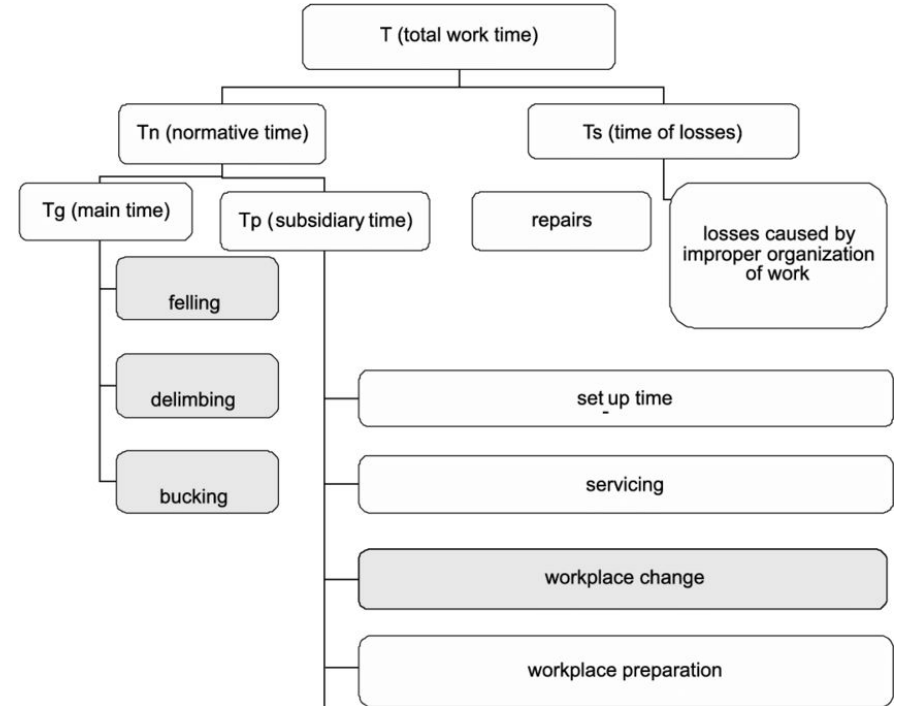

Service Available Market: of construction industry is 2.1 trillion in North America in 2021 also expected to double by 2030

Service Obtainable Market: will have a holding of 7% of North America's profit by 2028 which is 147 billion

# Business Model

- Designing safety infrastructure allowing construction workers to strive fluently.
- Price Matching feature to save money on tool accessories.
- Early adopter method (Long time customers receive better benefits)

# Proprietary Technology

Custom Analytical designs for new  
construction building without hard labor

# Competition:

## Time Efficient

- Quick Fix cheaper prices
- Set Time

## Affordable

- Reference contract workers
- WoodCure.co

## Time Consuming

- Work on their own time schedule and date set

## Expensive

- Independent contract workers

# WHY US?

# Market Plan

- Building Infrastructure to increase customer acquisitions that is nice for customers
